

Regular Category Mats Update

- As you all know the regular category mats of current WRO season (SMART Cities) are differently designed compared to previous seasons
- The new design has produced kind of pattern on the mat areas that may have lead the yellow and green colours not 100% sensor LEGO yellow and LEGO green
- For the current season teams should observe this as part of the challenge as the mats will be used as they are across regional, national and international competitions for the current season
- The regular category mats' material and quality at the WRO India (both regional and national) competitions 2019 will be same as they are sold on WRO India Official Kits & Mats Partner; Gugglu.com
